 Knives, Multi-tools, and More.

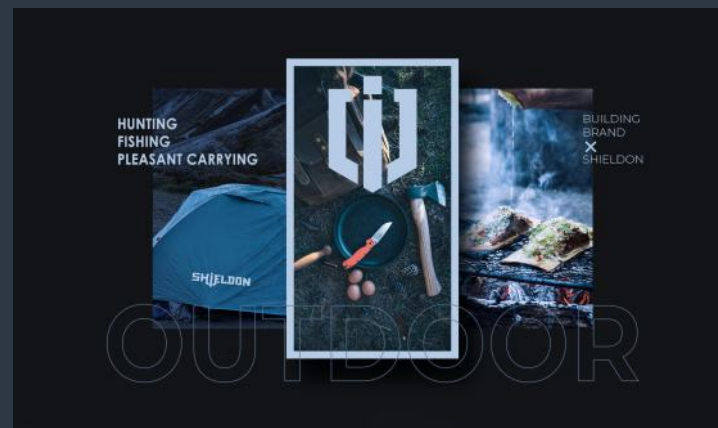

Introduction

Guangdong Shieldon Technology Co., Ltd. is established in 2020 in the competitive worldwide market. Thanks to the headquarter's skill from DKS, Shieldon acquires its expertise and is able to offer high quality and fashionable articles.

As a specialized exporter as well as an GB/T19001 – 2016/ISO9001:2015 certified associate manufacturer, we are primarily engaged in design, manufacturing and supplying for various kinds of pocket knives & multi-functional tools, together with distinctively pragmatic outdoor gear.

The value we output is a prominent one-stop service, not only in product quality and logistics but also its innovative idea and scientific notion, which ensures our clients could be favored with mutual benefits.

Blade Steel

HARDNESS(HRC): the resistance to chips and failure when subjected to beating, impact, twisting, and torsion.

EDGE RETENTION: a knife's ability to hold sharpness during use, whatever in dicing up box, firewood or sisal rope.

WEAR RESISTANCE: making for an all-day affair to bring them back to sharp quickly, which is vital in the wilderness.

CORROSION RESISTANCE: keeping away from pit and rust in humid, wet, and salty environment, or after meal prep acidic ingredients like citrus or tomatoes.

Handle Material

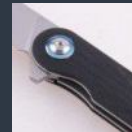

Titanium is a lightweight metal alloy, and it offers the best corrosion resistance of any metal. It's a little heavier than aluminum but still considered a much stronger metal.

Pros: Strong, light, corrosion resistance
Cons: Expensive, prone to scratches

Carbon Fiber is a generic term referring to thin strands of carbon being tightly woven then set in resin. It's super strong in a single direction but starts to break apart when stressed in other directions.

Pros: Strong, lightweight, eye-catching
Cons: Expensive, brittle

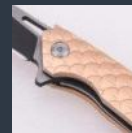

G-10 is a grade of Garylite that is a laminate composite made of fiberglass. Layers of fiberglass cloth and soaks are taken in resin, then compressed and baked under pressure.

Pros: Tough, light, durable
Cons: Brittle, lacks elegance

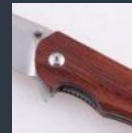

Micarta is made of thin layers of linen cloths soaked in a phenolic resin, producing a product that is lightweight, strong, and looks somewhat dressier than G-10.

Pros: Tough, light, durable
Cons: Expensive, brittle

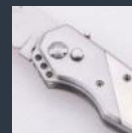

Aluminum, usually anodized for color, hardness and protection, is a very durable material for knife handles. It's a low-density metal that provides for a nice, hefty feel to the knife without weighing the knife down.

Pros: Light, durable, corrosion resistance
Cons: Cold to hold, slippery, prone to scratches

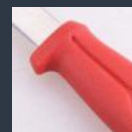

Wood, or bone, had been used as a knife handle since knives came into existence. A good quality wood handle can be durable and attractive, making wood a relatively inexpensive material for heavy-duty knives.

Pros: Various, attractive, durable, comfortable to hold
Cons: Porous and instable

Stainless steel provides nice durability and resistance to corrosion but is not lightweight and grippy. It's usually used in combination with plastic or rubber to improve the grip.

Pros: Strong, durable, corrosion resistant
Cons: Heavy, slippery

Zytel, or FRN (Fiberglass Reinforces Nylon), is a thermoplastic material introduced by DuPont. Zytel, or FRN, is super strong, resistant to bending, abrasion and practically indestructible.

Pros: Strong, tough, zero maintenance, inexpensive
Cons: Cheap plastic feel, less grippy than G-10

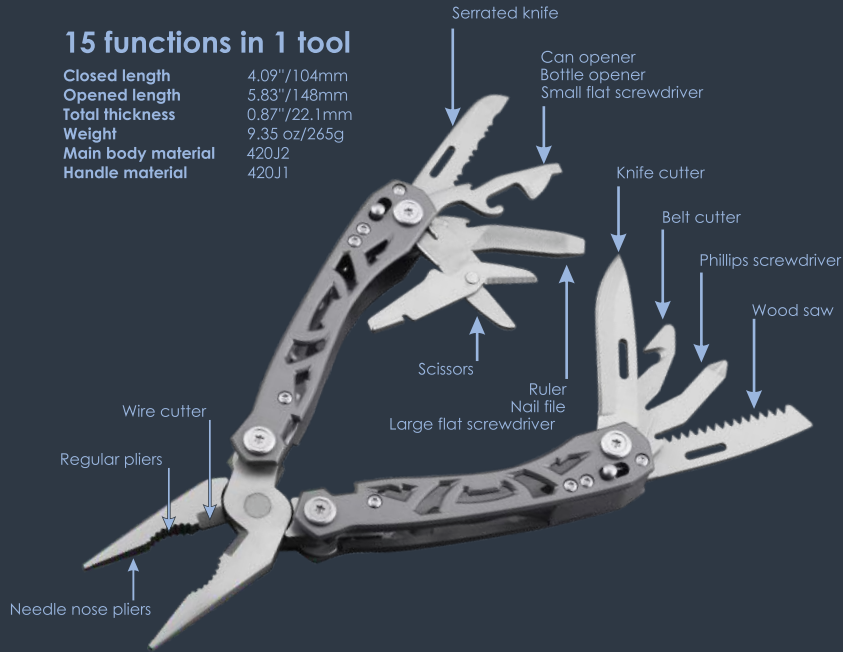

③ Multi-Tools

Matching the growing market demand, **SHIELDON** offers a range of modular multi-tools that you can customize to suit the needs of your audience. Adopting the right materials and the latest in manufacturing technology, our products undergo a strict quality control process that ensures reliable functionality and long-term use.

Patented Multi-pliers

15 functions in 1 tool

Closed length 4.09"/104mm
Opened length 5.83"/148mm
Total thickness 0.87"/22.1mm
Weight 9.35 oz/265g
Main body material 420J2
Handle material 420J1

11-in-1

- Needle nose pliers
- Regular pliers
- Wire cutter
- Knife sharpener with lock
- Serrated Knife with Lock
- Bottle opener
- Corkscrew
- Wood saw
- Phillips screwdriver
- Scissor (detachable)
- Ruler

Item NO. YR-6217
Closed length 4.13"/105mm
Opened length 6.38"/162mm
Total thickness 0.83"/21mm
Weight 11.18 oz/317g
Main body material 2Cr13
Handle material Anodized aluminum

29/30

Multi-Tools Multi-hammers

Life hammer can be replaced with spanner.

13-in-1

- Needle nose pliers
- Regular pliers
- Wire cutter
- Hammer
- Life hammer
- Nail claw
- Knife cutter
- Bottle opener
- Nail file
- Phillips screwdriver
- Inner hexagon
- 3 screw heads
- Screwdriver hole

Item NO. YR-6237
Closed length 6.3"/160mm
Opened length 6.38"/162mm
Total thickness 0.91"/23mm
Weight 15.41 oz/437g
Main body material 2Cr13
Handle material Anodized aluminum

Item NO SR-077A,SR-078A
Total length 7.28"/185mm
Blade length 3.15"/80mm
Weight 2.57 oz/73g
Blade material 4Cr13

Blade HRC 52-54
Handle material Aluminum
Blade style Clip Point
Lock mechanism Liner lock
Open way Flipper + hole

Item NO SR-401A,SR-402A,SR-402G,SR-402R,SR-403A,SR-404A
Total length 3.74"/95mm
Blade length 1.42"/36mm
Weight 0.88 oz/25g
Blade material 3Cr13
Blade HRC 50-52
Handle material Aluminum
Blade style Clip Point
Lock mechanism Liner lock
Open way Flipper + hole

Item NO. HF-KL044
 Opened length 6.73"/171mm
 Total thickness 0.83"/21mm
 Blade length 2.36"/60mm
 Weight 5.54 oz/157g
 Handle material Aluminum
 Locking blade Button Lock

5 pieces of replaceable blades in the back spacer.

Some of cutters are patented and multi-functional. Screwdrivers and wrenches can be found in some newly models.

Item NO. HF-KL029
 Opened length 7.17"/182mm
 Total thickness 0.67"/17mm
 Blade length 2.36"/60mm
 Weight 4.59 oz/130g
 Handle material Aluminum
 Locking blade Button Lock

Item NO. HF-GHK3
 Opened length 7.68"/195mm
 Total thickness 0.67"/17mm
 Blade length 2.36"/60mm
 Weight 5.64 oz/160g
 Handle material Aluminum
 Locking blade Button Lock

Item NO. HF-KL007A
 Opened length 6.18"/157mm
 Total thickness 0.59"/15mm
 Blade length 2.36"/60mm
 Weight 3.95 oz/112g
 Handle material Aluminum
 Locking blade Button lock

Item NO. HF-KL027-3
 Opened length 6.5"/165mm
 Total thickness 0.67"/17mm
 Blade length 2.36"/60mm
 Weight 4.44 oz/126g
 Handle material Aluminum
 Locking blade Button lock

Fire Cooking

Most multi-tools come equipped with pliers that can double as pincers to help grab ahold of meat. They're also great for flipping sausages and moving around piping hot pans or foil to help distribute the heat.

Set Up Tents

A good multi-tool has enough surface area to allow for a good whack. The knife and saw inside can also be used to fashion own stakes out of wood that found lying around.

Can Opener

Most of tools come with an opener attached, while some even have bottle openers for beers.

First Aid

Pocket a solid multi-tool then you can use it in emergencies to pull splinters and other objects from your skin. It can also be used to cut through a sleeve in case you need to fasten a quick bandage in a pinch.

Notch Belt (or any other leather)

Leather can make a blade go dull, so use the awl on the tool before it is loose. It can also be used to drill holes through wood, clothes, tents and shoes if need be.

Cracking Ice

If you wake up to find your gear frozen over in winter, you can whip out the awl to chisel away at it until it breaks. You can also use the blades as scrapers if you're in a tough spot.

Measure Your Catch

Make sure the trout caught is legal while fishing. Most tools come decked out with a ruler that can measure anything, from food caught in the wild to rope you want to hang from a tree.

Hang a Bear Bag

Close the tool and tie a rope around the center, then attach a bag and toss it over a branch. It weighs to keep the food from falling back to the ground as long as tied the other end down tightly to the ground or root.

Collaborate to expect reliable and predictable business success with our **OEM** service!

Step 1, Basic Enquiry

Express your need, and we will get back to you as soon as possible to provide solution and suggestion.

Step 2, Style Designing

Send us your graph in CAD format or simply state your idea. A customization from our range of items is also feasible.

Step 3, Offering Quote

After checking details on material, mechanism and functions, a suitable price within the project budget will be offered.

Step 4, Prototyping

Once the design details are checked, the prototype will be made to confirm, after which an order concerning knifemaking is ready to produce.

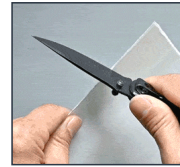

Step 5, Mass production

On the basis of mutual agreement, your unique knife is going to be available for mass production combining high-tech machines and great talented knifemasters.

Step 6, Inspection and delivery

When production is completed, a full inspection is conducted on the product's performance. At last, just wait for the delivery and receive your great knives.

Sharpness

The point of the blade should be in the 2/1 position of the spacer when the knife is closed. When the blade is not in the middle of the spacer, it won't pass the examination.

Product Structure

The goods must be the same structure as the prototype, using exactly the same components and assembly methods as per specification.

Product Appearance

Rust, oxidation, damage or dirt must not be seen on the blade, handle, and all other parts of the product. The entire tool must be in good condition. For carbon fiber, the gap should not exceed 0.02mm.

Packaging

All packaging of the products including PE bags, cases, etc. must not be broken, damaged, mutilated, or soiled.

Logo

Engraved or printed font patterns must match the sample. Missing, mutilated, faint, jagged, double-shaded, misspelled, or skewed letters are not allowed. Everything should be the same as the sample.

Assembly of Blade

By opening the blade and check the point, only when the spring is positioned in 1/3 of the blade indicates that the knife passes the inspection.

Blade Position

The point of the blade should be in the 2/1 position of the spacer when the knife is closed. When the blade is not in the middle of the spacer, it won't pass the examination.
