

XH-2502 Folding Knife: Compact, Versatile, and Affordable

In the world of everyday carry (EDC) tools, finding a folding knife that balances quality, functionality, and price can be a challenge. The **XH-2502 Folding Knife** from [Shieldon Manufacturing](#) & Trading Combo stands out as an exceptional option, offering a combination of a durable design, versatile utility, and an incredibly low price point. This folding knife is designed for those who need a reliable tool for daily use, whether at home, in the office, or outdoors. With its lightweight construction, integrated carabiner, and sleek black blade, the XH-2502 is the perfect choice for anyone seeking a compact and practical EDC knife at an unbeatable price.

Superior Blade Quality at a Budget-Friendly Price

At the heart of any folding knife is the blade, and the XH-2502 does not disappoint. The blade is crafted from **3Cr13 stainless steel**, a popular choice for budget-friendly knives due to its excellent balance of toughness, corrosion resistance, and ease of maintenance. This steel

provides solid performance for everyday cutting tasks, making it an ideal choice for general users who need a dependable blade without the need for frequent sharpening or maintenance.

The **clip point blade style** featured in the XH-2502 is highly versatile, offering a sharp tip for precision cutting, piercing, and slicing tasks. The blade's **2.48-inch (63mm)** length is perfect for a wide variety of everyday tasks, from opening packages to light food preparation, making it a must-have tool for daily use.

The blade's **blackened finish** gives it a sleek, tactical appearance while also providing additional protection against corrosion and wear. The **flat grind** ensures that the knife is sharp and effective for slicing through various materials, while the blade thickness of **0.098 inches (2.5mm)** offers a good balance between durability and cutting precision. With a **hardness rating of 50-52 HRC**, the XH-2502's blade holds a decent edge while being easy to sharpen, ensuring that it remains a reliable tool over time.

Compact, Lightweight, and Easy to Carry

One of the standout features of the XH-2502 Folding Knife is its lightweight and compact design. Weighing just **1.32 ounces (37.5g)**, this knife is incredibly easy to carry, making it perfect for those who want a reliable tool that won't add bulk to their pockets or bags. Its **total**

length of 6.06 inches (154mm) when fully opened makes it a manageable size for everyday tasks without being cumbersome, while the handle thickness of **0.433 inches (11mm)** ensures a comfortable grip for most hand sizes.

The knife's **PP (polypropylene) handle** is designed with both durability and comfort in mind. The lightweight nature of PP makes the handle easy to carry, while its tough construction

ensures it can withstand the rigors of daily use. The handle's all-black design offers a modern, minimalist look that appeals to a wide range of users, from outdoor enthusiasts to professionals seeking a discreet EDC tool.

Carabiner-Integrated Handle for Ultimate Convenience

One of the unique features of the XH-2502 Folding Knife is its **integrated carabiner**. This feature adds a level of convenience that sets it apart from other knives in its price range. The carabiner allows you to easily attach the knife to a backpack, belt loop, or keychain, ensuring that it's always within reach when you need it. Whether you're out hiking, working in the yard, or commuting to work, the carabiner offers a practical solution for carrying the knife without taking up valuable pocket space.

This makes the XH-2502 particularly well-suited for outdoor activities such as camping, hiking, or fishing, where having quick access to a reliable knife can be crucial. The lightweight design combined with the carabiner attachment makes it easy to carry without feeling weighed down, making it a go-to tool for any adventure.

Safe and Simple Operation

Safety and ease of use are key considerations when selecting a folding knife, and the XH-2502 excels in both areas. The knife features a **lockback mechanism**, which is known for its reliability and simplicity. This mechanism securely locks the blade in place when open, preventing accidental closures during use and providing added peace of mind. Whether you're using the knife for delicate tasks or heavier-duty cutting, the lockback mechanism ensures that the blade stays securely in position.

The knife is opened via a **nail mark** on the blade, a traditional and reliable opening method. While it doesn't offer one-handed opening like some modern knives, the nail mark provides a secure and controlled way to deploy the blade, ensuring safety during operation.

An Unbeatable Price for Bulk Purchases

One of the most attractive aspects of the XH-2502 Folding Knife is its affordability, especially for bulk buyers. Shieldon Manufacturing & Trading Combo offers this knife at a sourcing price of **less than \$1 per unit**, with a minimum order quantity (MOQ) of **1,200 units**. This makes the XH-2502 an excellent choice for businesses or organizations looking to purchase high-quality, functional knives in large quantities without exceeding their budget.

Given its low price point, the XH-2502 is ideal for a variety of applications:

- **Corporate Gifts:** The knife's compact size and practical features make it a great promotional item for businesses looking to offer branded EDC tools.
- **Retail and E-commerce:** This knife offers an excellent opportunity for resellers looking to offer a versatile, budget-friendly product to customers.
- **Outdoor Gear Kits:** Include the XH-2502 in survival, camping, or hiking kits as a lightweight and reliable cutting tool.
- **Event Giveaways:** At such a low price point, this knife is perfect for distributing at trade shows, company events, or outdoor expos.

Why Choose Shieldon Manufacturing & Trading Combo?

As a leader in OEM/ODM knife manufacturing, Shieldon Manufacturing & Trading Combo is committed to producing high-quality tools at competitive prices. With over 25 years of experience in the industry, Shieldon provides reliable, durable products that meet the needs of customers worldwide. The **XH-2502 Folding Knife** is a prime example of this commitment to excellence, offering outstanding functionality and design at a price that's hard to beat.

Conclusion: The Perfect Balance of Functionality and Affordability

Whether you're in the market for a dependable everyday carry knife or looking to purchase in bulk for business purposes, the **XH-2502 Folding Knife** from Shieldon Manufacturing & Trading Combo is an unbeatable option. With its durable **3Cr13 stainless steel blade**, lightweight **PP handle**, integrated **carabiner**, and **lockback mechanism**, this knife offers practicality and versatility at an incredibly low price.

Take advantage of Sheldon's bulk pricing today and experience the perfect combination of affordability and quality with the XH-2502 Folding Knife!

How to Open and Close a Folding Knife: A Comprehensive Guide

Folding knives have been essential tools for both everyday tasks and outdoor adventures for centuries. Their compact design allows for easy portability, making them a popular choice for those who need a reliable blade at hand. Understanding how to properly open and close a folding knife is crucial for safety and efficiency. In this guide, we will cover the basics of opening and closing a folding knife, including the different types of mechanisms, safety tips, and best practices.

Understanding Folding Knife Mechanisms

Before diving into the opening and closing process, it's essential to understand the different mechanisms that folding knives use to secure the blade when closed and to lock it when open.

Here are some of the most common types:

1. **Slip Joint:** This traditional mechanism relies on a spring-loaded bar that holds the blade in place when open but does not lock it. To open a slip joint knife, you simply pull on the blade while applying pressure to the spring. It will close if you release the pressure.
2. **Lockback:** This mechanism uses a locking bar that engages a notch on the blade when it is opened. To close a lockback knife, you need to press the release lever, allowing the blade to fold back into the handle.
3. **Liner Lock:** In this design, a part of the handle (the liner) moves into place against the blade to secure it when opened. To close a liner lock knife, you push the liner away from the blade with your finger, allowing it to fold back into the handle.
4. **Frame Lock:** Similar to the liner lock, but in this case, the frame of the handle itself acts as the locking mechanism. The process for closing a frame lock knife is the same: push the frame out of the way to fold the blade back.
5. **Assisted Opening:** Some folding knives feature a spring-assisted opening mechanism, allowing the blade to deploy quickly with a gentle push on the thumb stud or flipper.

How to Open a Folding Knife

Step-by-Step Instructions

1. **Assess Your Knife Type:** Before you attempt to open your folding knife, identify which type of mechanism it uses. Understanding the specific mechanism will help you open it correctly and safely.
2. **Grip the Knife Properly:** Hold the handle firmly with one hand, ensuring that your fingers are away from the blade. If your knife has a thumb stud or flipper, position your thumb or finger near this opening mechanism.
3. **Engage the Opening Mechanism:**
 - **For Slip Joint Knives:** Hold the handle and pull the blade out while applying pressure to the spring.
 - **For Lockback Knives:** Use your thumb to press the locking bar down while pulling the blade out with your other hand.

- **For Liner and Frame Lock Knives:** Use your thumb to push the liner or frame away from the blade while pulling the blade out.
 - **For Assisted Opening Knives:** Apply slight pressure to the thumb stud or flipper, and the blade will deploy automatically.
4. **Ensure the Blade is Fully Open:** Once the knife is open, ensure it has locked into position (if applicable) by checking that the locking mechanism is engaged.

How to Close a Folding Knife

Step-by-Step Instructions

1. **Prepare to Close:** Before closing the knife, ensure you are in a safe environment. Keep your fingers clear of the blade's path to avoid injuries.
2. **Engage the Locking Mechanism** (if applicable):
 - **For Lockback Knives:** Press the locking bar down firmly with your thumb while holding the handle securely.
 - **For Liner and Frame Lock Knives:** Push the liner or frame away from the blade using your thumb while gripping the handle.
3. **Fold the Blade:** With the locking mechanism disengaged, gently guide the blade back into the handle with your other hand. Avoid forcing the blade down, as this can damage the knife or cause injury.
4. **Check the Blade:** Once the blade is fully folded back into the handle, double-check to ensure it is securely closed. Some folding knives have a detent that helps keep the blade in place when closed, but it's always good practice to inspect.

Safety Tips for Using Folding Knives

- **Always Cut Away from Your Body:** When using the knife, ensure that you are cutting away from your body to reduce the risk of accidental injury.
- **Be Mindful of Your Surroundings:** Ensure you are in a safe and open area when opening or closing your knife, especially if you are using it outdoors.
- **Keep the Knife Clean and Maintained:** Regularly clean your folding knife to ensure smooth operation. Lubricate the pivot point as needed to prevent rust and wear.

Conclusion

Understanding how to open and close a [folding knife](#) is fundamental for anyone who uses these versatile tools. By knowing the different mechanisms and following the proper procedures, you can ensure a safe and efficient experience every time you use your folding knife. Remember, safety is paramount, so always handle your knife with care, and enjoy the

convenience and utility that folding knives bring to your everyday life. Whether you're using it for outdoor adventures, daily tasks, or as part of your EDC gear, mastering these skills will enhance your confidence and proficiency with this essential tool.
